

## AOS-KM-1

Miniature kinematic mount  
 0.3" x 0.3" x 0.2", non-magnetic 316 stainless steel

Rev 1.00  
 January 30, 2018

## DESCRIPTION

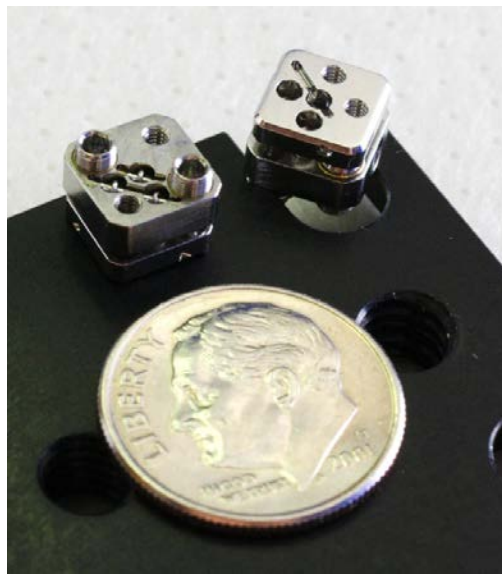

The AOS-KM-1 is an ultra-compact kinematic mount for small optics with high-resolution 200 TPI actuators.

## APPLICATIONS AND FEATURES

The AOS-KM-1 is designed for applications requiring small form factor, such as compact lasers and optical systems. The 316 stainless steel construction is ideal for applications requiring low magnetic field, such as atomic clocks, laser spectroscopy, and quantum technologies. The actuators have 200 TPI resolution. Sapphire jewel pads enhance stability and thermal drift.

## ORDERING INFORMATION

AOS-KM-1	0.3"x0.3"x0.2" kinematic mount	Minimum order quantity 10
